Tomatoes

high potassium & trace element blend

To

Fair Dinkum liquid seaweed for **Tomatoes** is a blend of organic liquid seaweed and added nutrients. Seaweed extract on its own is not a complete fertilizer so macro and micro nutrients have been added at an appropriate level.

Our **Tomatoes** blend has been specifically formulated with a high level ofpotassium to enhance fruit set and development. If grown in a reasonably fertile soil no other fertilizer treatment will be needed but if grown in a low nutrient potting mix it is suggested that a small amount of lime may be beneficial to enhance skin texture.

Compared with traditional tomato fertilizers Fair Dinkum Liquid Seaweed for **Tomatoes** will give better availability of both macro and micro nutrients and less build up of salts in the growing medium.

The seaweed extract component is made from fresh Bull Kelp, (Durvillea potatorum), collected from the rugged North West coast of Tasmania. It is manufactured using a warm hydrolysis process specially developed for fresh bull kelp. The process maximizes the extraction of plant growth regulators. The extract has been extensively tested in both laboratory and in the field. It contains a number of plant growth regulators, (or hormones), including auxins, cytokinins and betaines.

Tomatoes also contains a number of sugars and phenolics. These compounds are stable in the product and lead to increase chlorophyll production, increased root development, increased tolerance of environmental stress caused by drought, frost, insect attack and salinity and increased uptake of "locked-up" nutrients.

The product is suitable for both plants in pots or in the soil but should not be used for two weeks after planting out until seedlings are established.

Application Rates
Established seedlings
Add 20 ml of product to 9 ltrs of water.
Apply with a watering can every week to ten days

Established plants
Add 30 ml of product to 9 ltrs of water.
Apply every ten to fourteen days.

May be applied as a soil drench or a foliar feed.

Analysis	
Nitrogen	4.0 %
Phosphorus	1.5 %
Potassium	7.1 %
Copper	180 ppm
Zinc	60 ppm
Manganese	155 ppm
Boron	90 ppm
Iron	420 ppm
Magnesium	1100 ppm
Filtration	100 mic

%W/V is grams per 100ml of product
ppm is parts per million on weight basis
g/l is grams per litre
mic = microns
